

TRACKING WILDLIFE:

Summer in Yellowstone is a prime time for wildlife research. As part of the EPI Fellowship Reunion, you'll contribute to conservation efforts by gathering data for the park's Bison & Bear teams, observing wolves in Lamar Valley, exploring geothermal wonders, and monitoring amphibians in the Custer-Gallatin National Forest.

YOUR IMPACT:

From habitat shifts to population dynamics, your fieldwork helps inform critical wildlife conservation in the Greater Yellowstone Ecosystem. Park researchers rely on citizen scientists like you to support ongoing efforts that protect these species and their habitats.

FELLOWSHIP CONNECTIONS:

While your contributions to conservation are invaluable, this reunion is about YOU! Reconnect with other past Fellows, share experiences, and enjoy time in nature with a passionate, motivated community that understands the power of field-based education.

WHITewater ADVENTURE:

Beyond fieldwork, you'll hike the Grand Canyon of the Yellowstone, take in breathtaking landscapes, and cap off your adventure with a whitewater rafting trip down the Yellowstone River. It's the perfect mix of hands-on conservation, exploration, and fun!

JULY 15 - 21, 2025

HELP US CELEBRATE EPI'S 25TH
ANNIVERSARY WITH OUR FIRST EVER:

FELLOWSHIP REUNION YELLOWSTONE

HIGHLIGHTS

ASSIST BISON, BEAR, AND AMPHIBIAN
MONITORING PROJECTS.

NETWORK WITH PAST FELLOWS WHILE
ENJOYING THIS ICONIC LANDSCAPE.
